Claim Objections

1. Claim 9 is objected to because of the following informalities: in line 6, the word "adjaacent" is miss-spelled; replace it with "adjacent". Appropriate correction is required. See MPEP § 608.01(b).

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6, 9 and 10 drawn to image resizing, classified in class 382 subclass 298.
- II. Claims 7, 8, 11 and 12 drawn to image synthesizing, classified in class 382, subclass 284.

Inventions II and I are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, the claimed invention II has separate utility such as image synthesizing process, and this utility is not needed by invention I which is image resizing process. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even through the requirement be traversed (37 CFR 1.143).
